

Just off the grade

Just wanted to make folks aware of the great resources available with our fine library & staff. Some enlightening DVDs are my favorites: "Journey of the Universe," "The Living Matrix," and rounding out this trilogy, "I Am!"

Brian Swimme hosts our journey with his elegant insights of our emergence from a dark past to a clarity of understanding just how we got here, who we are, and the possibilities of what all this self-organization can mean for our near future. "The Living Matrix" is a more nuts and bolts kind of presentation. I love proof, evidence and finally truth. This feature documents thoughts of ideas which correspond with this connected theme of this spontaneous self-organizing phenomenon.

And finally, Tom Shadyac discovers Crow's Visions new view and grounds us with his insightfully transformational "I Am."

"You never fly so high that your feathers will not fall back to earth!" – some ingenious human being

Signed,
